

## Shuniah Landfill Services

### Scrap Metal

A scrap metal collection program is available at the landfills, and we will accept all forms of scrap metal, appliances, and metal-based items from residents and businesses in Shuniah.

Please note that our on-site attendants have the final say for what will or will not be accepted as "Scrap Metal"

### Used Tires

Only available at **MacGregor Landfill**. The Municipality is registered with Ontario Tire Stewardship and accepts tires from most passenger (both on and off-road), industrial, and agricultural vehicles at the landfill - provided that the tires are without rims.

### Used Oil

A used oil collection area is located at both Landfill Sites. Users are required to pour the used oil into the holding tank and properly dispose of used containers.
