

Appendix B Photolog

Photo 1: Existing conditions in organic meadow marsh (B144) in northwest portion of Study Area. Facing south. June 10, 2025

Photo 2: Existing conditions in B144 in northwest portion of Study Area. Facing north. June 10, 2025

Photo 3: Existing conditions in fresh, silty to fine loamy mixedwood (B108) in northwest portion of Study Area. Facing north. June 10, 2025

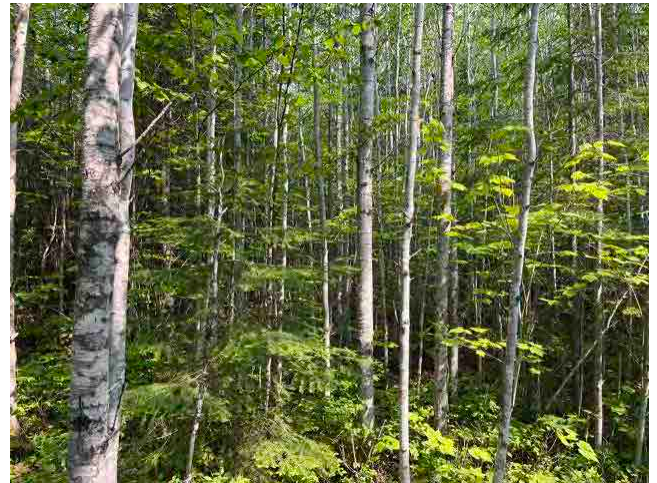

Photo 4: Existing conditions in fresh, silty to fine loamy Aspen – Birch hardwood (B104) in northeast portion of Study Area. Facing north. June 10, 2025

Photo 5: Existing conditions in B104 in northeast portion of Study Area. Facing south. June 10, 2025

Photo 6: Existing conditions in B108 west of proposed Grann Drive expansion in northeast portion of Study Area. Facing west. June 10, 2025

Photo 7: Existing conditions in B108 west of proposed Grann Drive expansion in northeast portion of Study Area. Facing east. June 10, 2025

Photo 8: Existing conditions at Lake Superior shoreline in northeast portion of Study Area. Facing north. June 10, 2025

Photo 9: Existing conditions at Lake Superior shoreline in northeast portion of Study Area. Facing east. June 10, 2025

Photo 10: Existing conditions at Lake Superior shoreline in northeast portion of Study Area. Facing south. June 10, 2025

Photo 11: Existing conditions at Lake Superior shoreline in northeast portion of Study Area. Facing west. June 10, 2025

Photo 12: Existing conditions in intolerant hardwood swamp (B130) at Lake Superior shoreline. Facing east. June 10, 2025

Photo 13: Existing conditions across from B144 along Lake Superior shoreline. Facing south. June 10, 2025

Photo 14: Existing conditions in B144 along Lake Superior Shoreline. Facing east. June 10, 2025

Photo 15: Existing conditions in organic thicket swamp (B135) along Lake Superior Shoreline. Facing east. June 10, 2025

Photo 16: Existing conditions in B135 at Lake Superior shoreline. Facing south. June 10, 2025

Photo 17: Existing conditions at Lake Superior shoreline east of wetland cluster. Facing north. June 10, 2025

Photo 18: Existing conditions at Lake Superior shoreline east of wetland cluster. Facing north. June 10, 2025

Photo 19: Existing conditions in mineral thicket swamp (B134/135) within southeast portion of Study Area. Facing south. June 10, 2025

Photo 20: Existing conditions in B134/135 within southeast portion of Study Area. Facing north. June 10, 2025

Photo 21: Existing conditions in northern B134/135. Facing northeast. June 10, 2025

Photo 22: Existing conditions in B108 within southeastern portion of the Study Area. Facing south. June 10, 2025

Photo 23: Existing conditions in B108 within southeastern portion of the Study Area. Facing west. June 10, 2025

Photo 24: Existing conditions at B104 in southwest portion of the Study Area. Facing north. June 10, 2025

Photo 25: Existing conditions at B104 in southwest portion of the Study Area. Facing west. June 10, 2025

Photo 26: Existing conditions at B104 in north portion of of vegetation community. Facing south. June 10, 2025

Photo 27: Existing conditions at B108 along west Subject Property boundary in lower portion of the Study Area. Facing north. June 10, 2025

Photo 28: Pileated Woodpecker (PIWO) feeding cavities in the B108 located east of BBA09. June 6, 2023

Photo 29: Candidate bat roost tree in B108 immediately west of proposed Grann Drive extension. June 10, 2025

Photo 30: Groundwater upwelling (spring) in B108 within the northeast portion of the Study Area. Facing north. June 10, 2025

Photo 31: Candidate bat roost tree / PIWO nesting cavity tree in B108 immediately east of BBA08. June 10, 2025

Photo 32: Green Frog observed incidentally in B144 in northwest portion of Study Area. June 10, 2025

Photo 33: Tri-colored Bumble Bee observed immediately northeast of Bat-02. June 10, 2025

Photo 34: Bear print in mud along proposed Grann Drive expansion. June 10, 2025

Photo 35: Coyote scat observed west of BBA02 in B108. June 10, 2025

Photo 36: Evidence of PIWO activity (cavities) in B108 located in northeast portion of Study Area. June 11, 2025

Photo 37: SM3BAT Autonomous recording unit (ARU) placement at BBA15. June 9, 2025

Photo 38: SM4BAT ARU placement at BBA22. June 9, 2025

Photo 39: Wildlife camera at WC02 in B108. June 10, 2025

Photo 40: Visual of White-tailed Deer recorded on WC01. June 18, 2025

Photo 41: Visual of White-tailed Deer recorded on WC01. June 22, 2025
