

COMMUNITY SAFETY AND WELL-BEING PLAN

Municipality of Shuniah

2026–2030

Executive Summary

The Municipality of Shuniah is a safe, welcoming and resilient rural community where residents value quality of life, strong neighbourhood connections, and the natural environment. Maintaining this high quality of life requires ongoing attention to community safety, well-being, and the factors that contribute to healthy and connected communities.

Community Safety and Well-Being (CSWB) planning provides an opportunity for municipalities to identify local priorities, strengthen partnerships, and focus on prevention. It recognizes that community safety is influenced not only by emergency services, but also by access to supports, community connections, infrastructure, and opportunities that contribute to overall well-being.

This plan identifies practical and achievable priorities based on resident input, available data, and municipal experience. It focuses on areas where the Municipality can make a meaningful contribution through education, awareness, coordination and advocacy.

The priorities identified in this plan are:

- Traffic, road and pedestrian safety
- Aging in place and senior well-being
- Connecting Residents to Services and Resources
- Community safety and crime prevention
- Mental health, crisis response and community support awareness

This plan reflects Shuniah's role as a rural municipality by focusing on realistic actions rather than large-scale program delivery. Many services affecting community well-being are delivered by provincial agencies and service organizations. The Municipality's role is to support prevention, improve awareness, strengthen partnerships and advocate for services that benefit residents.

Community safety and well-being is a shared responsibility. Through continued collaboration, practical actions, and ongoing monitoring of community needs, Shuniah will continue to support a safe and healthy community for all residents.

Message from the Mayor

The safety and well-being of our residents remains one of Council's highest priorities. Shuniah is a community where people look out for one another and take pride in the place they call home.

This Community Safety and Well-Being Plan reflects Council's commitment to maintaining that strong foundation. It focuses on practical steps that help keep our community safe, connected and supportive while recognizing the realities of a small rural municipality.

The plan identifies priorities that residents will resonate with including road safety, support for seniors, access to services, and maintaining the strong sense of community that makes Shuniah special. It also recognizes the important role of our partners including emergency services, health providers, social service agencies and community organizations.

Council understands that many of the issues affecting community well-being require cooperation between municipalities and other levels of government. We will continue to advocate for services that support our residents while focusing on the areas where we can make a direct difference locally.

On behalf of Council, I would like to thank the many residents, staff, volunteers and partners who contribute to making Shuniah a safe and welcoming community.

Shuniah remains a great place to live, and this plan helps to ensure this quality is sustained.

**Mayor
Municipality of Shuniah**

Message from the Chief Administrative Officer

Community safety and well-being planning is ultimately about taking a practical look at what helps communities remain strong, resilient and connected.

For Shuniah, this means focusing on achievable priorities that reflect both resident concerns and the Municipality's ability to take meaningful action. As a rural municipality, our strength is in supporting prevention, improving awareness of services, maintaining strong municipal services, and working collaboratively with partners who deliver large social services and programs.

This plan reflects a practical approach. It focuses on actions that can be implemented through existing municipal operations while identifying areas where advocacy and partnership will be important.

It is also important to recognize that Shuniah benefits from many strengths including engaged residents, dedicated emergency services, and an active community life. These strengths are an important part of community safety and well-being and help prevent larger issues from developing.

This plan represents a starting point. Community needs evolve, and the Municipality will continue to monitor trends, listen to residents, and work with partners to support the well-being of the community.

On behalf of Administration, I would like to thank Council, staff, emergency services members, partner organizations and residents for their ongoing contributions to the safety and well-being of Shuniah.

**Chief Administrative Officer
Municipality of Shuniah**

About the Municipality of Shuniah

The Municipality of Shuniah is a rural community located along the north shore of Lake Superior. Known for its natural beauty, strong community spirit and high quality of life, Shuniah provides residents with a safe and welcoming environment.

The community is characterized by:

- Rural residential development
- Active recreation programs
- Dedicated emergency services
- Access to outdoor recreation
- Strong connections to neighbouring communities

Like many rural municipalities, Shuniah also faces challenges related to:

- Access to services due to geography
- Transportation considerations
- Aging population trends
- Connectivity challenges
- Housing availability
- Maintaining services with limited resources

This plan reflects both the strengths and challenges of the community.

What is Community Safety and Well-Being?

Community safety and well-being is achieved when residents feel safe, have a sense of belonging, and have access to the supports they need.

CSWB planning recognizes four key areas:

Social Development

Long-term actions that strengthen communities and reduce risk factors.

Prevention

Actions that reduce risks before they escalate.

Risk Intervention

Collaborative responses to emerging concerns.

Incident Response

Emergency response through police, fire and EMS.

Shuniah's plan focuses primarily on social development and prevention activities, which are the areas where municipalities can often have the greatest long-term impact.

Guiding Principles

This plan was developed using the following guiding principles:

Practical

Focus on realistic actions within municipal capacity.

Resident-Focused

Reflect issues important to the community.

Collaborative

Recognize the role of partnerships.

Preventative

Focus on reducing risks early.

Strength-Based

Build on what Shuniah already does well.

Flexible

Allow the plan to evolve over time.

Community Strengths

Shuniah benefits from many positive factors that contribute to community safety and well-being including:

- Strong community pride
- Recreation programming
- Community events
- Strong neighbourhood connections
- Natural environment supporting wellness
- Engaged municipal leadership

These strengths play an important role in prevention and community resilience.

Partnership Approach

Community safety and well-being requires collaboration. Key partners may include:

Emergency Services:

- Ontario Provincial Police
- Shuniah Fire & Emergency Services
- Emergency Medical Services

Health and Social Services:

- Thunder Bay District Social Services Administration Board
- Public Health agencies
- Mental health providers

Community Organizations:

- Service clubs
- Recreation groups
- Volunteer organizations

Government Partners:

- Province of Ontario
- Federal partners where applicable
- Neighbouring municipalities

The Municipality's role is to support coordination, communication and advocacy while focusing on areas within municipal influence.

Implementation Approach

The Municipality will advance this plan through:

- Existing municipal programs
- Communication and awareness initiatives
- Partnerships and collaboration
- Monitoring available information
- Advocacy to other governments

Actions will be implemented within available resources.

Monitoring and Review

This plan is intended to be practical and adaptable. The Municipality may review priorities periodically to ensure they remain relevant.

Progress may be monitored through:

- Completion of actions
- Available data trends
- Resident feedback
- Ongoing municipal experience

Shuniah Community Safety and Well-Being Priorities

Approach to Setting Priorities

The Municipality of Shuniah's Community Safety and Well-Being priorities were developed based on resident feedback, local data, and the realities of a small rural municipality. Rather than attempting to address every possible social issue, this plan focuses on a limited number of priorities where the Municipality can make practical contributions through education, coordination, prevention, advocacy and local leadership.

As a rural municipality, Shuniah's role is strongest where it can:

- Identify local risk factors affecting residents
- Educate and inform the public
- Improve awareness of available services
- Support community connections and prevention
- Advocate to provincial agencies and partners
- Monitor local trends over time

The following priorities reflect issues identified by residents while also recognizing the Municipality's realistic sphere of influence.

Priority 1: Traffic, Road and Pedestrian Safety

Why this is a priority

Residents consistently identified traffic safety, speeding, pedestrian safety and concerns related to ATVs, golf carts and similar vehicles as important community safety issues. In a rural municipality without sidewalks in many areas, road safety affects residents of all ages including seniors, children and recreational users.

This is also an area where the Municipality can take visible and practical action.

Actions Shuniah can realistically influence:

Identify local safety concerns

- Maintain a list of known traffic safety concern locations based on resident input and operational knowledge
- Review areas near recreation facilities, trails and public places

Improve public awareness

- Share seasonal road safety reminders
- Provide information on safe ATV and off-road vehicle use
- Promote safe driving messaging through municipal communications

Support enforcement priorities

- Meet periodically with OPP to identify Shuniah-specific traffic concerns
- Share complaint trends to help inform enforcement priorities
- Share local safety concerns with enforcement partners

Make practical infrastructure improvements

- Review signage for clarity and visibility during normal road maintenance cycles
- Consider speed display boards where concerns are recurring (speed trailer use)
- Review expansion of events and activities signage
- Improve pavement markings where appropriate and affordable

Why these actions matter

These actions are achievable, visible and directly respond to resident concerns while staying within municipal authority.

Priority 2: Aging in Place and Senior Well-Being

Why this is a priority

Shuniah has an older population compared to many municipalities, and residents identified aging in place and senior supports as important issues. Supporting seniors to remain safely and comfortably in their homes contributes directly to community stability and well-being.

This priority also reflects the importance of reducing social isolation and ensuring residents can access services as they age.

Actions Shuniah can realistically influence:

Improve access to information

- Develop a simple guide of services available to seniors
- Share information on transportation, health supports and community programs

Support age-friendly municipal practices

- Consider accessibility in municipal facilities and public spaces
- Continue improving accessibility features where feasible

Support social connection

- Encourage programming for seniors and intergenerational activities
- Promote volunteerism and community opportunities that reduce isolation

Advocate for needed services

- Identify gaps in services affecting seniors
- Share these concerns with provincial and regional partners

Why these actions matter

These actions help seniors remain connected and supported without requiring the Municipality to provide health or social services directly.

Priority 3: Connecting Residents to Services and Resources

Why this is a priority

Residents identified challenges related to access to services, awareness of programs, and the importance of maintaining Shuniah's strong sense of community. In rural communities, the challenge is often not whether services exist, but whether residents know how to access them.

Community connection is also recognized as a protective factor that helps reduce isolation, improves well-being and supports prevention.

The Municipality can play an important role as a connector by improving awareness of services while also supporting opportunities for residents to remain engaged in the community.

Actions Shuniah can realistically influence:

Improve awareness of available services

- Maintain and share a community services directory
- Promote available supports through the municipal website and communications
- Share information on DSSAB and regional programs

Improve service navigation

- Help residents understand where to go for assistance
- Improve clarity around municipal versus agency responsibilities

Support community programming and connection

- Continue supporting recreation and community events
- Promote opportunities for residents to participate
- Encourage intergenerational programming opportunities

Encourage community involvement

- Support volunteerism and local initiatives
- Recognize community contributions where appropriate

Support community spaces

- Maintain municipal facilities as welcoming gathering spaces
- Encourage use of parks, trails and recreation facilities

Advocate for rural service access

- Identify service gaps affecting residents
- Share concerns with appropriate agencies

Why these actions matter

These actions strengthen both access to services and community belonging while recognizing the Municipality's role as a facilitator rather than a service provider.

Priority 4: Community Safety and Crime Prevention

Why this is a priority

Residents identified crime prevention, policing visibility and enforcement concerns. While overall safety perceptions remain positive, maintaining confidence in community safety is important.

Police statistics also provide useful information to help understand trends affecting the community.

Actions Shuniah can realistically influence:

Support prevention and awareness

- Share information on property crime prevention
- Promote fraud prevention awareness
- Support public education on reporting concerns

Work with policing partners

- Maintain communication with OPP regarding local concerns
- Share trends where appropriate

Monitor trends

- Review available police statistics periodically (annual OPP calls for service)
- Identify emerging concerns affecting residents

Improve communication

- Share general safety information with residents
- Provide updates on community safety initiatives

Why these actions matter

These actions strengthen prevention and awareness while recognizing that policing services are delivered by the Province.

Priority 5: Mental Health, Addictions Awareness, Crisis Response and Community Supports

Why this is a priority

Mental health challenges, addictions concerns, and crisis situations are increasingly identified across Ontario as factors affecting community safety and well-being. While these services are primarily delivered by the health system and provincial agencies, municipalities often play an important supporting role in improving awareness, supporting coordination, and helping residents navigate available resources.

Rural communities can face additional challenges including distance from services, limited awareness of available supports, and uncertainty about how to respond when individuals are experiencing crisis situations.

The Municipality recognizes that it is not a service provider in this area. However, it can play a constructive role in supporting awareness, strengthening partnerships, and helping residents understand available response options.

Actions Shuniah can realistically influence:

Improve awareness of mental health supports

- Share information about crisis lines and regional mental health services
- Promote available supports through municipal communications
- Include mental health resources in community information materials

Support understanding of response pathways

- Provide information on when to contact emergency services versus social supports
- Improve awareness of available crisis response options

Support coordination with partners

- Maintain communication with OPP and partner agencies regarding emerging issues
- Support opportunities for information sharing where appropriate

Promote prevention and awareness

- Share information during mental health awareness initiatives
- Support community awareness opportunities where feasible

Advocate for rural access to services

- Identify service gaps affecting Shuniah residents
- Share rural service needs with partner agencies and Province

Why these actions matter

These actions allow the Municipality to support prevention, awareness and coordination while recognizing that mental health and crisis response services are delivered by specialized agencies. This approach ensures Shuniah contributes appropriately without assuming responsibilities outside municipal authority.

Appendix: A

Actions Requiring Provincial or Agency Leadership

The following issues were identified by residents but require leadership from agencies funded or mandated by the Province. Shuniah's role is primarily advocacy, coordination and information sharing.

Mental health and addictions services

Lead: Health system and provincial agencies

Municipal role: Information sharing, advocacy, awareness support

Healthcare access

Lead: Ministry of Health and healthcare providers

Municipal role: Advocacy and local coordination support

Affordable and supportive housing

Lead: TBDSSAB and Province

Municipal role: Planning support and advocacy

Rural transportation systems

Lead: DSSAB, Province and regional partners

Municipal role: Identify needs and support coordination

Internet and cellular infrastructure

Lead: Telecom providers and senior governments

Municipal role: Advocacy and identification of service gaps

Income supports and affordability pressures

Lead: Provincial and federal governments

Municipal role: Information sharing and advocacy

Child care capacity

Lead: DSSAB and Province

Municipal role: Support awareness and partnerships

**** Note: Many of these issues were identified through the survey but are not included as a priority at this time given available municipal resources.**

Shuniah's Community Safety and Well-Being Plan focuses on practical actions that reflect the Municipality's role as a rural local government. The intent is not to duplicate services provided by other agencies, but to strengthen prevention, improve awareness, support residents, and advocate for the services our community needs.

Appendix B – Community Engagement Survey Results

Purpose of Community Engagement

As part of the development of the Municipality of Shuniah’s Community Safety and Well-Being Plan, a community survey was undertaken to gather resident perspectives on safety, quality of life, access to services and emerging local issues.

The purpose of the survey was to:

- Understand resident perceptions of safety and well-being
- Identify priority issues affecting the community
- Better understand demographic characteristics
- Support evidence-based priority setting
- Ensure the CSWB Plan reflects resident experiences

A total of approximately **215 responses** were collected across survey questions, providing a strong level of engagement for a municipality of Shuniah’s size.

Overall Community Satisfaction

Survey results indicate residents are generally satisfied with the quality of life in Shuniah.

Key findings include:

Community cleanliness

- 79% satisfied or very satisfied
- 9.8% dissatisfied
- 11% neutral

Quality of recreational activities

- 60% satisfied or very satisfied
- 11.7% very satisfied
- 11.7% dissatisfied
- 28% neutral

Sense of community

- 63% satisfied or very satisfied
- 11% dissatisfied
- 26% neutral

These results suggest residents generally view Shuniah as a positive place to live with a strong sense of community.

Access to Services

Survey responses indicate residents see room for improvement in access to some services.

Access to healthcare

- 27.6% satisfied
- 34.3% dissatisfied
- 38% neutral

Access to mental health services

- 14.9% satisfied
- 32.2% dissatisfied
- 52.8% neutral

Access to public transportation

- 6.7% satisfied
- 44.7% dissatisfied
- 48.6% neutral

Services for seniors

- 14.8% satisfied
- 38.3% dissatisfied
- 46.9% neutral

These results reinforce the importance of improving awareness of available services and advocating for improved access where possible.

Community Safety Perceptions

Survey results show strong perceptions of safety within Shuniah.

Do you feel safe in your community?

- Yes – 85.7%
- No – 8.4%
- Unsure – 5.9%

Safety walking during daylight hours

- 92.9% feel safe

Safety walking at any time with others

- 88.7% feel safe

Knowledge of who to call if safety threatened

- 79% indicated they would know who to contact
- 21% indicated uncertainty

This supports Shuniah's position as a safe community while identifying opportunities to improve awareness of reporting pathways.

Sense of Belonging and Well-Being

Residents generally reported strong personal well-being indicators.

Sense of belonging

- 67.6% satisfied or very satisfied
- 23% neutral
- 9% dissatisfied

General happiness

- 89.6% positive or very positive
- 8.4% neutral
- 2% negative

Self-reported health

- 70.9% excellent or very good
- 26.1% fair
- 3% poor

These indicators suggest strong overall community well-being.

Top Issues Identified by Residents

Residents were asked to identify the most pressing safety and well-being issues.

The most frequently identified issues included:

Issue	% Identified Responses	
Rising cost of living	53%	104
Traffic and road safety	52%	101
Internet connectivity	42%	83
Aging in place	34%	67
Crime prevention	32%	63
Age-friendly initiatives	31%	60
Community belonging	29%	57
Access to services	24%	47
Affordable housing	20%	40
Public transportation	19%	38

These results directly informed the priorities established in the CSWB Plan.

Mental Health and Social Issues

Residents also identified:

- Adult mental health concerns – 11.7%
- Addictions concerns – 10.7%
- Youth mental health – 6.6%
- Poverty concerns – 5.6%
- Domestic violence – 3.1%

While not the highest ranked issues, these findings support including mental health awareness within the CSWB priorities.

Demographic Profile of Respondents

Survey participants were primarily older adults, which reflects the municipality's demographics.

Age distribution

Age Group	%
65-74	29%
55-64	22%
45-54	16%
35-44	14%
25-34	9%
75+	9%

This demographic profile reinforces the focus on aging in place and access to services.

Household Characteristics

Housing status

- 71% homeowners
- 2% renters
- 41% retirees
- 32% employed outside Shuniah

Residency

- 83% year-round residents
- 16% seasonal residents

These figures confirm Shuniah's rural residential character.

Income Distribution

Household income responses indicate a broad middle-income distribution:

Income Range	%
\$50K–\$75K	28%
\$75K–\$100K	25%

Income Range %

Over \$100K 24%

\$25K–\$50K 16%

Education Levels

Respondents indicated relatively strong education levels:

Education %

College / trades 35%

Bachelor degree 24%

Graduate degree 21%

High school 11%

Key Observations

Several important observations can be drawn from survey results:

1 Residents feel safe

Perceptions of safety are very strong.

2 Quality of life is high

Strong happiness and belonging indicators.

3 Rural access challenges exist

Transportation and healthcare access remain concerns.

4 Aging demographics influence needs

Survey age distribution supports senior priorities.

5 Prevention focus is appropriate

Issues identified support awareness and prevention approaches.

How Survey Results Influenced the Plan

The survey results directly informed the CSWB priorities including:

- Traffic safety concerns → Traffic Safety priority
- Aging population → Seniors priority
- Service access → Access to Services priority
- Crime concerns → Community Safety priority
- Mental health concerns → Mental Health priority

This alignment demonstrates the plan reflects resident priorities.

Limitations of Survey Results

As with all voluntary surveys:

- Participation is self-selected
- Results reflect respondent perspectives
- Results represent themes rather than statistical sampling

Despite these limitations, the results provide strong insight into community priorities.

Conclusion

The community engagement survey provided valuable insight into the priorities, strengths and concerns of Shuniah residents. Results confirm that Shuniah remains a safe and desirable community while highlighting practical areas where awareness, coordination and advocacy can support continued well-being.

The results support the Municipality's approach of focusing on:

- Prevention
- Awareness
- Community connection
- Practical municipal actions
- Partnerships with service providers

Appendix: C - CSWB Plan Survey

Shuniah Community Safety and Well-Being (CSWB) Plan Survey

The Municipality of Shuniah is developing a Community Safety and Well-Being Plan.

Community Safety and Well-Being (CSWB) plans are Provincially mandated under Bill 175, Safer Ontario Act, 2018. Bill 175 requires all municipalities to develop a CSWB plan for their local municipality.

The CSWB plan aspires to build a sustainable community where everyone is safe, has a sense of belonging and opportunities to participate, and where individuals and families can meet their needs for education, health care, food, housing, income, and social and cultural expression.

We are looking for your assistance in advising us on what you believe, or have experienced to be, the priorities for your community and any challenges, obstacles, or gaps in addressing the issues identified in the survey below. We welcome your thoughts or ideas on how best to prioritize and create solutions to the above areas of risk.

By participating in this survey, you agree to the collection of your answers and the use of information from your responses to inform community safety and well-being planning. This information will be shared to help develop the local Plan to support broader community safety and well-being planning. Your personal information will not be attached to your responses; on overall results, without individual identifying information, will be shared with the Municipality. The CSWB Plan will be made available to the general public and posted on the municipal website.
